DETAILED ACTION

The reply filed by Applicants on 07/07/2007 is hereby acknowledged. All rejections not addressed in this office action are considered withdrawn due to arguments by Applicant when taken together with the claim amendments.

Claims 1-54 are pending with claims 6-9 and 15-16 remaining withdrawn as being drawn to nonelected subject matter. Claims 1-5, 10-14 and 17-54 are hereby examined upon the merits.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-5, 10-14, 17-22, 24-30, 37-44 and 51-54 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 3-

4, 6, 8, 11, 13, 15 and 17 of U.S. Patent No. 6566585. Although the conflicting claims are not identical, they are not patentably distinct from each other because the working examples that enable US Patent 6566585 are the embodiments claimed in the instant application, and are therefore disclosed in US Patent 6566585 as the exemplified embodiments of the invention.

Claims 23, 31-36 and 45-50 are currently depending from rejected claims but would be allowable if rewritten in independent form.
